PROFILE

Hi, I'm Julio Cundumi, a technology enthusiast and student of the career "Software Development Technology". I have knowledge in technologies such as React, Angular, Git, JavaScript, TypeScript, Node, Express, among others, with which I have created web applications implementing the MERN and MEAN stack.

I work mainly in Frontend development with Angular and React frameworks, and if required I can do backend with node.js and express.js.

EXPERIENCE / PROJECTS

Nov 2023

E-Commerce Website

- E-commerce website with functions to create, update and delete products, equipped with jwt authentication, shopping cart, a role system and other features.

- Tools used:
